01 — WHO WE ARE

A newly established organisation, built on a proper foundation

Vandana Security and Manpower Services (VSMS) is a **PSARA-licensed, Nagda-based security guarding, manpower and facility-services provider**, established in December 2025 and building its operations across Madhya Pradesh.

Established in December 2025, VSMS is building its operations from Nagda with a clear focus on compliance, workforce readiness, client requirements and responsible growth. VSMS is early in its journey, but deliberate about how it builds.

VSMS begins with the basics that institutional clients look for first: a registered business, statutory registrations, a physical office, an identified management team and a defined service framework. This profile states what is in place today and what VSMS is building towards, and keeps the two clearly apart.

BRAND PHILOSOPHY

"We communicate what we have, build what we promise, and grow with integrity."

IN BRIEF

Organisation	Vandana Security and Manpower Services (brand: VSMS), a proprietorship established in December 2025.
Base	Nagda Junction, District Ujjain, Madhya Pradesh.
Authorisation	PSARA licence applicable across Madhya Pradesh.
Service focus	Security guarding, industrial and warehouse security, event security, manpower solutions, integrated facility management and housekeeping.
Approach	A defined operating framework, from understanding client requirements to reviewing and improving service delivery.
Leadership	Vandana Singh Tomar, Founder & Proprietor; Avinash Singh Chauhan, Operations Manager.

- ✓ **Domain and business email**
  vsmsindia.com and contact@vsmsindia.com.
- ✓ **Brand identity and structure**
  Corporate brand identity and initial organisational structure in place.

BUILDING TOWARDS

- ☐ **Expanded regional presence**
- ☐ **Larger operational workforce**
- ☐ **Deeper service capabilities**
- ☐ **Broader client portfolio**
- ☐ **Enhanced reporting systems**

Items in this column are development objectives. They are not presented as current capability or achievement.

Why this distinction matters. Clients and procurement teams should be able to tell what has been verified from what is planned. VSMS presents its position as it is today. Registration documents are shared with prospective clients on request.

04 — OUR SERVICES

Service focus and capability areas

These are the service areas VSMS is set up to offer. They describe capability and focus; they are not a record of past deployments.

01 Security Guarding

Guarding for access control, premises protection, patrolling and visitor and material movement, structured by site and shift.

02 Industrial Security

Security arrangements for plants and industrial premises, including gate control, perimeter awareness and coordination with site management.

03 Warehouse Security

Guarding for warehouses and storage locations, covering inward and outward movement, shift coverage and reporting to site management.

04 Corporate & Commercial Security

Access control and front-of-house security for offices and commercial buildings, aligned to the client's visitor and premises protocols.

05 Event Security

Temporary security deployments for planned events, organised around venue layout, access points and expected footfall.

06 Manpower Solutions

Supply of manpower to client requirements, with attention to suitability, attendance discipline and replacement planning.

07 Integrated Facility Management

Coordinated facility support services under a single point of accountability, developed alongside security services.

08 Housekeeping / Facility Services

Housekeeping and general facility support for commercial, institutional and industrial premises.

05 — CUSTOMER ENVIRONMENTS

Where VSMS intends to serve

Target service environments, and the kind of requirement each typically involves.

01
Residential Communities
Entry and exit control, visitor management and patrolling.

02
Commercial Buildings
Access control, lobby coordination and parking area supervision.

03
Corporate Offices
Reception-area security, access discipline and visitor handling.

04
Manufacturing
Gate control, shift-wise deployment and material movement checks.

05
Warehouses
Inward and outward movement control and storage-area vigilance.

06
Logistics
Vehicle entry and exit, yard coordination and dispatch-area security.

07
Industrial Plants
Plant access, perimeter awareness and adherence to site safety rules.

08
Hospitals
Round-the-clock cover, visitor flow and sensitive-area discipline.

09
Educational Institutions
Campus access control, visitor management and event-day arrangements.

10
Retail
Entry management, crowd flow and store-floor awareness.

11
Hotels
Guest-area access, vehicle coordination and event support.

12
Government Environments
Protocol-driven premises with documentation and compliance expectations.

Environments listed are target service environments. Requirements differ by site, and VSMS defines the deployment structure for each after understanding the client's specific needs.

06 — SERVICE DELIVERY FRAMEWORK

Built around what each client actually requires

Clients do not merely purchase guards or manpower. They require reliable deployment, supervision, compliance, responsiveness and continuity.

01
UNDERSTAND
Understand the client's site, workforce, operating environment, security requirements and service expectations.

02
ASSESS
Assess manpower requirements, deployment structure, shift requirements, site conditions, risk considerations and operational dependencies.

03
PLAN
Define deployment requirements, supervision, manpower allocation, communication and escalation arrangements.

04
DEPLOY
Deploy suitable personnel according to the agreed scope and site requirements.

05
SUPERVISE
Maintain operational oversight, attendance discipline, communication and client coordination.

06
RESPOND
Address operational changes, absenteeism, replacement requirements, incidents and emerging site-level requirements through defined escalation and response mechanisms.

07
REVIEW
Review service performance, client feedback, attendance, deployment quality and operational issues.

08
IMPROVE
Use review findings to improve service delivery and maintain alignment with changing client requirements.

CONTINUOUS CYCLE: IMPROVE FEEDS BACK INTO UNDERSTAND

Status of this framework. This is VSMS's defined and intended operating framework for client engagements. It describes how VSMS plans to work with each client and does not describe the past performance of the organisation.

07 — OPERATIONAL READINESS & EXIGENCY MANAGEMENT

How VSMS thinks about operational contingencies

VSMS approaches operational contingencies through **preparedness, defined escalation, communication, supervision, replacement planning and client coordination.**

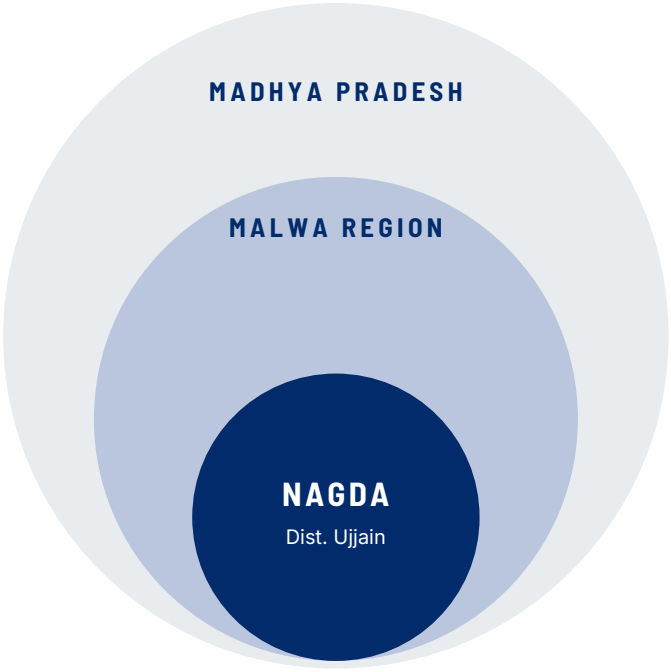

Manpower continuity | Replacement readiness | Escalation | Supervision | Communication | Incident response | Changing site requirements | Client coordination

OPERATIONAL EXIGENCY	VSMS APPROACH
Absenteeism and workforce availability	Attendance discipline, supervisory follow-up and replacement planning so that assigned posts are covered.
Emergency replacement requirements	Escalation to the Operations Manager and arrangement of replacement personnel in coordination with the client.
Sudden deployment and shift changes	Revised deployment communicated through agreed contacts, with supervised handover between shifts.
Site access issues and unusual site conditions	Site-specific briefing and coordination with the client's site management on access and conditions.
Security incidents	Response as per client and site instructions, escalation to VSMS operations and the client, and incident reporting.
Communication breakdowns	Identified points of contact on both sides and a defined escalation path.
High-risk operating environments	Requirements assessed before deployment, with deployment structure and supervision aligned to the assessment.
Changing client requirements and compliance	Periodic review, scope adjusted by mutual agreement, and statutory compliance kept in view throughout.

No blanket guarantees. VSMS does not offer assurances such as zero incidents or fixed replacement times. Service levels, where required, are agreed formally with each client.

08 — MARKET & GEOGRAPHIC DEVELOPMENT

Building from Nagda, growing with readiness

HOME BASE

Nagda, District Ujjain

Initial market development: Nagda and surrounding areas.

MALWA MARKET DEVELOPMENT PRIORITIES

Regional development

Progressive development based on client requirements and readiness.

Ujjain | Ratlam | Dewas | Mandsaur | Agar Malwa | Neemuch | Shajapur | Dhar

WIDER MADHYA PRADESH

Industrial and metropolitan markets

Selected markets, entered as operational readiness allows.

Indore | Pithampur | Bhopal

PSARA LICENCE APPLICABILITY

Entire Madhya Pradesh

The licence authorises private security operations across the state.

OPERATING BASE TODAY

Nagda, District Ujjain

Regional presence is developed progressively, not assumed from licence coverage.

Reading this page. Locations shown are market development priorities and the geographic growth direction. VSMS does not currently claim offices or active deployments in these locations beyond its Nagda base.

09 — LEADERSHIP & ORGANISATION

The people responsible

FOUNDER & PROPRIETOR

Vandana Singh Tomar

Proprietor of Vandana Security and Manpower Services, with overall responsibility for the business.

OPERATIONS MANAGER

Avinash Singh Chauhan

Operations function, covering deployment, supervision and client coordination under the operating framework.

FUNCTIONAL AREAS OF THE ORGANISATION

Operations and deployment

Site deployment, shift structure and manpower allocation.

Supervision and attendance

Oversight of posts, attendance discipline and replacements.

Compliance and documentation

Statutory registrations, licence conditions and records.

Client coordination and reporting

Points of contact, escalation, service reviews and reports.

Organisation stage. VSMS operates with an initial organisational structure. As operations grow, supervisory and support functions will be added in step with client requirements, so that structure keeps pace with responsibility.

10 — RESPONSIBLE GROWTH

Four commitments that guide how VSMS builds

01 COMPLIANCE

- PSARA licence applicable across Madhya Pradesh
- GST, Udyam / MSME and Trade Licence in place
- Statutory obligations treated as a starting condition, not an afterthought

02 WORKFORCE READINESS

- Suitable personnel matched to site requirements
- Attendance and supervision discipline
- Replacement planning for continuity of service

03 CLIENT REQUIREMENTS

- Deployment shaped around each site's actual needs
- Defined points of contact and escalation
- Periodic review and adjustment of scope

04 RESPONSIBLE GROWTH

- Commitments made only where VSMS can deliver
- Expansion guided by operational readiness
- Claims limited to what can be shown

WHAT THE TAGLINE MEANS

REAL. CLEAR. PROFESSIONAL.

REAL
VSMS states what it has, and does not manufacture history.

CLEAR
Structure, scope and responsibility are set out plainly.

PROFESSIONAL
Service is planned, supervised and reviewed with discipline.

11 — WHY CLIENTS CAN ENGAGE WITH VSMS

Six reasons, stated plainly

1 Structured approach

A defined operating framework runs from understanding the requirement through to review and improvement.

2 Compliance foundation

PSARA licence, GST registration, Udyam / MSME registration and Trade Licence are in place.

3 Customer requirements first

Deployment is shaped around each site's actual needs, not a fixed template.

4 Responsive coordination

An identified operations contact and a defined escalation path for day-to-day and urgent matters.

5 Operational preparedness

Absenteeism, replacement, shift changes and incidents are planned for before deployment, not after.

6 Responsible growth

Commitments are made where VSMS can deliver, and expansion follows operational readiness.

HOW AN ENGAGEMENT BEGINS

01
Requirement discussion
A conversation with VSMS operations about the site, scope and expectations.

02
Site understanding and assessment
Manpower, shift, supervision and risk considerations are assessed for the site.

03
Proposal and deployment plan
A defined deployment, supervision and escalation plan for the client's review.
